

MASTER UNIVERSE BY DESIGN

The Architects of the Master Universe are the governing corps of the Paradise Transcendentals. This governing corps numbers 28,011 personalities possessing master minds, superb spirits, and supernal absonties. The presiding officer of this magnificent group, the senior Master Architect, is the co-ordinating head of all Paradise intelligences below the level of Deity. Once completed as an Absolute construction the Master Universe will be based on four reality levels.

- 1) Finite and finite integration.
- 2) Absonite and Absonite-Absolute integration.
- 3) The Absolute and integration with Paradise.
- 4) Consummation of Universe Destiny through the Deity Absolute with the Universal Absolute as the Consummator of Universe Destiny.

In these diagrams the outer space zones are disproportional. Their true proportions can be better understood by the numbers of the Architects of the Master Universe as shown in the following table.

ARCHITECTS of the MASTER UNIVERSE		
LEVEL		NUMBER
1	The Paradise Zone	1
2	The Havona Zone	3
3	The Superuniverse Zone	7
4	The First Outer Space Zone	70
5	The Second Outer Space Zone	490
6	The Third Outer Space Zone	3,430
7	The Fourth Outer Space Zone	24,010
		Total: 28,011

When completed the SUs will host approx. 7 trillion inhabitable spheres.

SU NAME <small>(SuperUniverse)</small>	CREATIVE PURPOSE	MANAGED BY
1 - Orillington.....	of the Universal Father.....	Master Spirit 1 - Siraya
2 - Orvando.....	of the Eternal Son.....	Master Spirit 2 - Kuwaya
3 - Manvando.....	of the Infinite Spirit.....	Master Spirit 3 - Moiraya
4 - Lanterton.....	of Father and Son.....	Master Spirit 4 - Ocilliaya
5 - Lexerton.....	of Father and Spirit.....	Master Spirit 5 - Mantrinaya
6 - Oreyparena.....	of Son and Spirit.....	Master Spirit 6 - Luminaya
7 - Orvonton.....	of Father Son and Spirit.....	Master Spirit 7 - Aya

GRAVITY SYSTEMS OF THE MASTER UNIVERSE

- PHYSICAL GRAVITY: the Paradise gravity grasp. The Grand Universe currently using about 5%.
- SPIRITUAL GRAVITY: the Eternal Son's gravity grasp. Currently only in the Grand Universe.
- MIND GRAVITY: the Infinite Spirit's gravity grasp. About 85% in the Grand Universe.
- PERSONALITY GRAVITY: the Universal Father's gravity grasp. Can be recognized but not measured.

The Isle of Paradise is about 4 billion light years in width.

Outer Space Zone (OSZ) 1 is about 25.4 billion light years in width.

OSZ 1, 2, 3, space is almost equally above and below the Central Continuum.

OSZ 4 is larger than the first three Outer Space Zones.

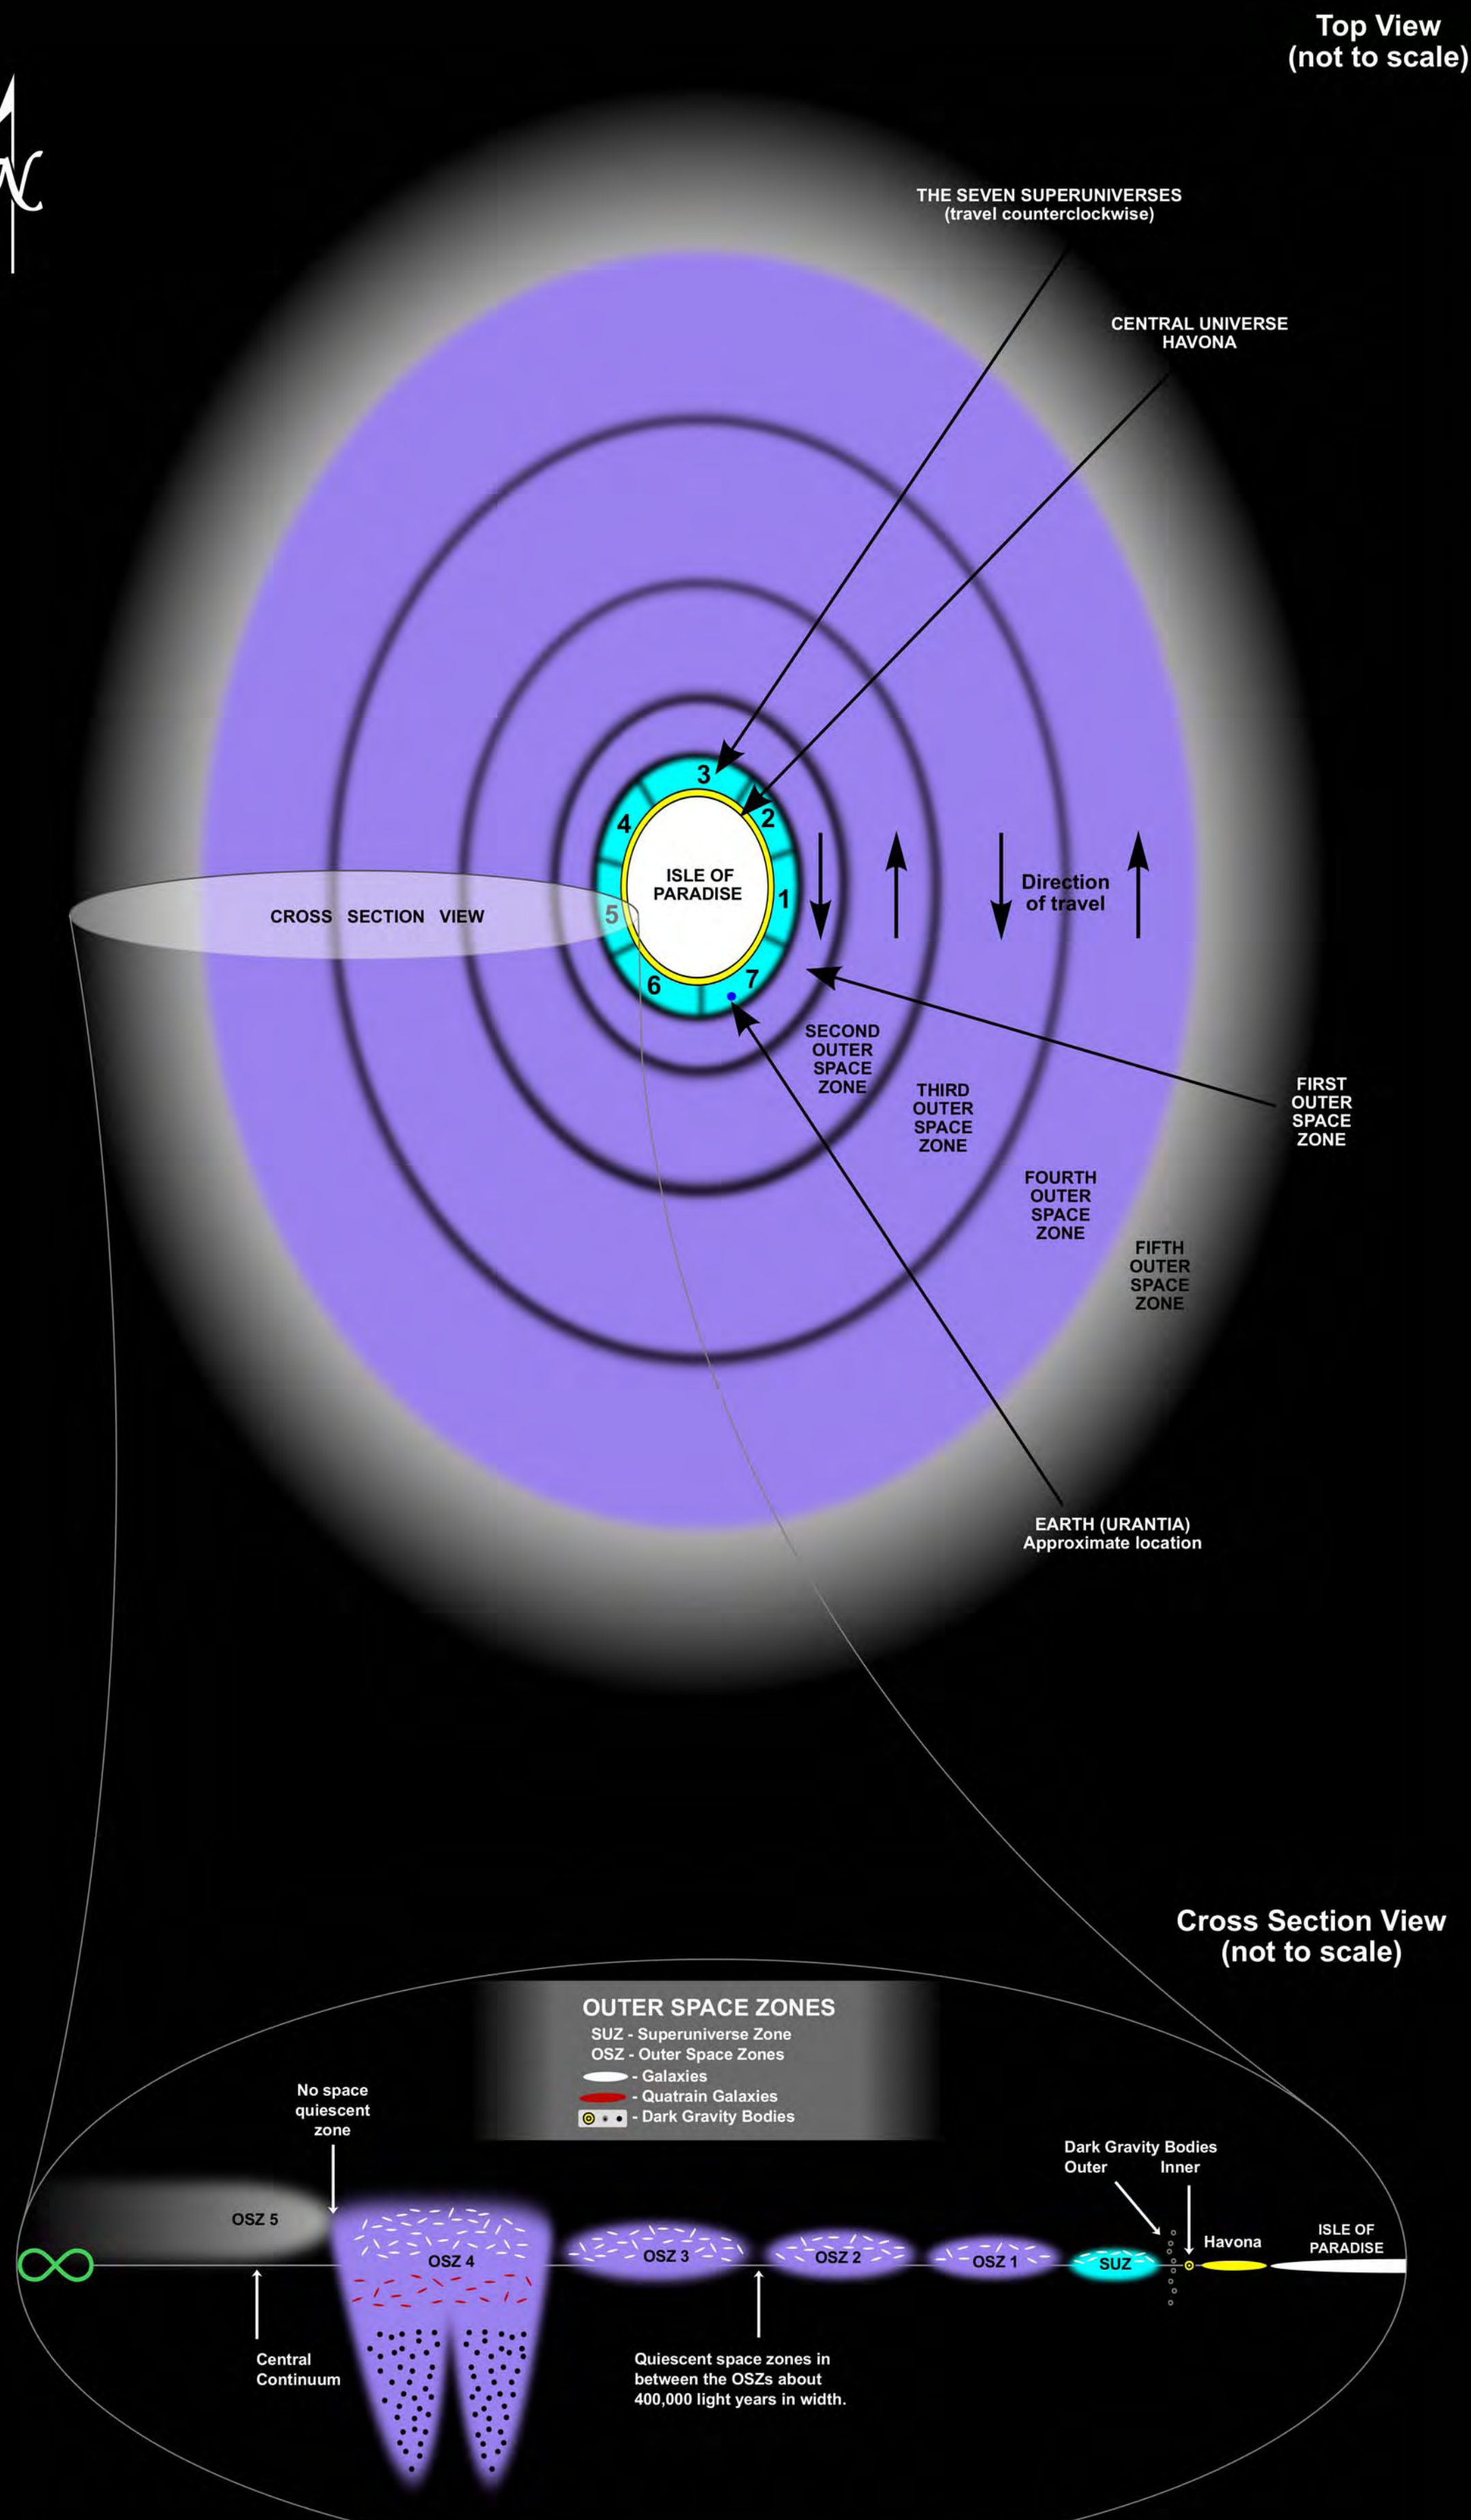

OSZ 4 has more space below the Central Continuum and is conical in shape.

The top of OSZ 4 is flatter in shape. The new gravity bodies in the bottom of OSZ 4 are transition gravitons and will be amassed in great quantities when OSZ 4 is complete.

OSZ 5 has no space below the Central Continuum and what space there is shades into undefined gravitons into no-space which will become the Havona Extension someday.

Insofar as known OSZ 5 is Absolute and compliments the no-space position of Paradise by space entropy - the removal of space debris and space extensions is leveling the Master Universe into a short playing field of several trillion light years in its space dimensions and no distance eternity in its Absolute areas extending outward to one day form a Macro Paradise.

The seeming ellipsoid space partitions of the Master Universe are drawn and cleaved down from their top to their bottom space extensions. The student need realize that these slices are complete ellipsoid-shaped donuts (flattened torus) around the Isle of Paradise as shown in the Top View.

Space Levels of the Master Universe

The universe of universes is not an infinite plane, a boundless cube, nor a limitless circle; it certainly has dimensions. The laws of physical organization and administration prove conclusively that the whole vast aggregation of force-energy and matter-power functions ultimately as a space unit, as an organized and co-ordinated whole. The observable behavior of the material creation constitutes evidence of a physical universe of definite limits. The final proof of both a circular and delimited universe is afforded by the, to us, well-known fact that all forms of basic energy ever swing around the curved path of the space levels of the master universe in obedience to the incessant and absolute pull of Paradise gravity.

The successive space levels of the master universe constitute the major divisions of pervaded space — total creation, organized and partially inhabited or yet to be organized and inhabited. If the master universe were not a series of elliptical space levels of lessened resistance to motion, alternating with zones of relative quiescence, we conceive that some of the cosmic energies would be observed to shoot off on an infinite range, off on a straight-line path into trackless space; but we never find force, energy, or matter thus behaving; ever they whirl, always swinging onward in the tracks of the great space circuits.

Proceeding outward from Paradise through the horizontal extension of pervaded space, the master universe is existent in six concentric ellipses, the space levels encircling the central Isle:

- The Central Universe — Havona.
 - The Seven Superuniverses.
 - The First Outer Space Level.
 - The Second Outer Space Level.
 - The Third Outer Space Level.
 - The Fourth and Outermost Space Level.
