

## PARADISE GRAVITY

11:8.1. The inescapable pull of gravity effectively grips all the worlds of all the universes of all space. Gravity is the all-powerful grasp of the physical presence of Paradise. Gravity is the omnipotent strand on which are strung the gleaming stars, blazing suns, and whirling spheres which constitute the universal physical adornment of the eternal God, who is all things, fills all things, and in whom all things consist.

11:8.2. The center and focal point of absolute material gravity is the Isle of Paradise, complemented by the dark gravity bodies encircling Havona and equilibrated by the upper and nether space reservoirs. All known emanations of nether Paradise invariably and unerringly respond to the central gravity pull operating upon the endless circuits of the elliptical space levels of the master universe. Every known form of cosmic reality has the bend of the ages, the trend of the circle, the swing of the great ellipse.

11:8.3. Space is nonresponsive to gravity, but it acts as an equilibrant on gravity. Without the space cushion, explosive action would jerk surrounding space bodies. Pervaded space also exerts an antigravity influence upon physical or linear gravity; space can actually neutralize such gravity action even though it cannot delay it. Absolute gravity is Paradise gravity. Local or linear gravity pertains to the electrical stage of energy or matter; it operates within the central, super-, and outer universes, wherever suitable materialization has taken place.

11:8.4. The numerous forms of cosmic force, physical energy, universe power, and various materializations disclose three general, though not perfectly clear-cut, stages of response to Paradise gravity:

11:8.5. **1) Pregravity Stages (Force).**  
This is the first step in the individuation of space potency into the pre-energy forms of cosmic force. This state is analogous to the concept of the primordial force-charge of space, sometimes called pure energy or segregata.

11:8.6. **2) Gravity Stages (Energy).**  
This modification of the force-charge of space is produced by the action of the Paradise force organizers. It signalizes the appearance of energy systems responsive to the pull of Paradise gravity. This emergent energy is originally neutral but consequent upon further metamorphosis will exhibit the so-called negative and positive qualities. We designate these stages ultimata.

11:8.7. **3) Postgravity Stages (Universe Power).**  
In this stage, energy-matter discloses response to the control of linear gravity. In the central universe these physical systems are threefold organizations known as triata. They are the superpower mother systems of the creations of time and space. The physical systems of the superuniverses are mobilized by the Universe Power Directors and their associates. These material organizations are dual in constitution and are known as gravita. The dark gravity bodies encircling Havona are neither triata nor gravita, and their drawing power discloses both forms of physical gravity, linear and absolute.

11:8.8. Space potency is not subject to the interactions of any form of gravitation. This primal endowment of Paradise is not an actual level of reality, but it is ancestral to all relative functional nonspirit realities—all manifestations of force-energy and the organization of power and matter. Space potency is a term difficult to define. It does not mean that which is ancestral to space; its meaning should convey the idea of the potencies and potentials existent within space. It may be roughly conceived to include all those absolute influences and potentials which emanate from Paradise and constitute the space presence of the Unqualified Absolute.

11:8.9. Paradise is the absolute source and the eternal focal point of all energy-matter in the universe of universes. The Unqualified Absolute is the revealer, regulator, and repository of that which has Paradise as its source and origin. The universal presence of the Unqualified Absolute seems to be equivalent to the concept of a potential infinity of gravity extension, an elastic tension of Paradise presence. This concept aids us in grasping the fact that everything is drawn inward towards Paradise. The illustration is crude but nonetheless helpful. It also explains why gravity always acts preferentially in the plane perpendicular to the mass, a phenomenon indicative of the differential dimensions of Paradise and the surrounding creations.

## THE PRESENT MASTER UNIVERSE

## Cross Section View (not to scale)

**OUTER SPACE ZONES**  
 SUZ - Superuniverse Zone  
 OSZ - Outer Space Zones  
 - Galaxies  
 - Dark Gravity Bodies

## THE NATURE OF GRAVITY

- Paradise gravity grasps the basic units of material existence,
- the spirit gravity of the Eternal Son operates directly upon the fundamental values of spirit existence, and
- the mind gravity of the Conjoint Actor unerringly clutches all vital meanings of intellectual existence.

## UNIVERSAL GRAVITY

12:3.1. All forms of force-energy—material, mindal, or spiritual—are alike subject to those grasps, those universal presences, which we call gravity. Personality also is responsive to gravity—to the Father's exclusive circuit; but though this circuit is exclusive to the Father, he is not excluded from the other circuits; the Universal Father is infinite and acts over all four absolute-gravity circuits in the master universe:

- 12:3.2. 1) The Personality Gravity of the Universal Father.
- 12:3.3. 2) The Spirit Gravity of the Eternal Son.
- 12:3.4. 3) The Mind Gravity of the Conjoint Actor.
- 12:3.5. 4) The Cosmic Gravity of the Isle of Paradise.

12:3.6. These four circuits are not related to the nether Paradise force center; they are neither force, energy, nor power circuits. They are absolute presence circuits and like God are independent of time and space.

12:3.7. In this connection it is interesting to record certain observations made on Uversa during recent millenniums by the corps of gravity researchers. This expert group of workers has arrived at the following conclusions regarding the different gravity systems of the master universe:

## PHYSICAL GRAVITY

12:3.8. **Physical Gravity.**  
Having formulated an estimate of the summation of the entire physical-gravity capacity of the grand universe, they have laboriously effected a comparison of this finding with the estimated total of absolute gravity presence now operative. These calculations indicate that the total gravity action on the grand universe is a very small part of the estimated gravity pull of Paradise, computed on the basis of the gravity response of basic physical units of universe matter. These investigators reach the amazing conclusion that the central universe and the surrounding seven superuniverses are at the present time making use of only about five per cent of the active functioning of the Paradise absolute-gravity grasp. In other words: At the present moment about ninety-five per cent of the active cosmic-gravity action of the Isle of Paradise, computed on this totality theory, is engaged in controlling material systems beyond the borders of the present organized universes. These calculations all refer to absolute gravity; linear gravity is an interactive phenomenon which can be computed only by knowing the actual Paradise gravity.

## PERSONALITY GRAVITY

12:3.12. **Personality Gravity** is noncomputable. We recognize the circuit, but we cannot measure either qualitative or quantitative realities responsive thereto.

## SPIRITUAL GRAVITY

12:3.9.2. **Spiritual Gravity.**  
By the same technique of comparative estimation and calculation these researchers have explored the present reaction capacity of spirit gravity and, with the co-operation of Solitary Messengers and other spirit personalities, have arrived at the summation of the active spirit gravity of the Second Source and Center. And it is most instructive to note that they find about the same value for the actual and functional presence of spirit gravity in the grand universe that they postulate for the present total of active spirit gravity. In other words: At the present time practically the entire spirit gravity of the Eternal Son, computed on this theory of totality, is observable as functioning in the grand universe. If these findings are dependable, we may conclude that the universes now evolving in outer space are at the present time wholly nonspiritual. And if this is true, it would satisfactorily explain why spirit-endowed beings are in possession of little or no information about these vast energy manifestations aside from knowing the fact of their physical existence.

## MIND GRAVITY

12:3.10.3. **Mind Gravity.**  
By these same principles of comparative computation these experts have attacked the problem of mind-gravity presence and response. The mind unit of estimation was arrived at by averaging three material and three spiritual types of mentality, although the type of mind found in the power directors and their associates proved to be a disturbing factor in the effort to arrive at a basic unit for mind-gravity estimation. There was little to impede the estimation of the present capacity of the Third Source and Center for mind-gravity function in accordance with this theory of totality. Although the findings in this instance are not so conclusive as in the estimates of physical and spirit gravity, they are, comparatively considered, very instructive, even intriguing. These investigators deduce that about eighty-five per cent of the mind-gravity response to the intellectual drawing of the Conjoint Actor takes origin in the existing grand universe. This would suggest the possibility that mind activities are involved in connection with the observable physical activities now in progress throughout the realms of outer space. While this estimate is probably far from accurate, it accords, in principle, with our belief that intelligent force organizers are at present directing universe evolution in the space levels beyond the present outer limits of the grand universe. Whatever the nature of this postulated intelligence, it is apparently not spirit-gravity responsive.

12:3.11. But all these computations are at best estimates based on assumed laws. We think they are fairly reliable. Even if a few spirit beings were located in outer space, their collective presence would not markedly influence calculations involving such enormous measurements.

## LINEAR GRAVITY

0:6.6 2) **Emergent energy** embraces those energies which are responsive to Paradise gravity but are as yet unresponsive to local or linear gravity. This is the pre-electronic level of energy-matter.

0:6.7 3) **Universe power** includes all forms of energy which, while still responding to Paradise gravity, are directly responsive to linear gravity. This is the electronic level of energy-matter and all subsequent evolutions thereof.

12:8.10 1) **Matter.** Organized energy which is subject to linear gravity except as it is modified by motion and conditioned by mind.

11:8.7 3) **Postgravity Stages (Universe Power).**  
In this stage, energy-matter discloses response to the control of linear gravity. In the central universe these physical systems are threefold organizations known as triata. They are the superpower mother systems of the creations of time and space. The physical systems of the superuniverses are mobilized by the Universe Power Directors and their associates. These material organizations are dual in constitution and are known as gravita. The dark gravity bodies encircling Havona are neither triata nor gravita, and their drawing power discloses both forms of physical gravity, linear and absolute.

29:2.15 The electronic organization of universe power functions in seven phases and discloses varying response to local or linear gravity. This sevenfold circuit proceeds from the superuniverse power centers and pervades each supercreation. Such specialized currents of time and space are definite and localized energy movements initiated and directed for specific purposes, such as the Gulf Stream functions as a circumscribed phenomenon in the midst of the Atlantic Ocean.

11:8.3 Space is nonresponsive to gravity, but it acts as an equilibrant on gravity. Without the space cushion, explosive action would jerk surrounding space bodies. Pervaded space also exerts an antigravity influence upon physical or linear gravity; space can actually neutralize such gravity action even though it cannot delay it. Absolute gravity is Paradise gravity. Local or linear gravity pertains to the electrical stage of energy or matter; it operates within the central, super-, and outer universes, wherever suitable materialization has taken place.

42:6.2 Local or linear gravity becomes fully operative with the appearance of the atomic organization of matter. Preatomic matter becomes slightly gravity responsive when activated by X ray and other similar energies, but no measurable linear-gravity pull is exerted on free, unattached, and uncharged electronic-energy particles or on unassociated ultimatoms.

42:11.5 Linear-gravity response is a quantitative measure of nonspirit energy. All mass — organized measure — is subject to this grasp except as motion and mind act upon it. Linear gravity is the short-range cohesive force of the macrocosmos somewhat as the forces of intra-atomic cohesion are the short-range forces of the microcosmos. Physical materialized energy, organized as so-called matter, cannot traverse space without affecting linear-gravity response. Although such gravity response is directly proportional to mass, it is so modified by intervening space that the final result is no more than roughly approximated when expressed as inversely according to the square of the distance. Space eventually conquers linear gravitation because of the presence therein of the antigravity influences of numerous supermaterial forces which operate to neutralize gravity action and all responses thereto.
