

DRIVING THE MASTER UNIVERSE

CROSS SECTION VIEW
(not to scale)

A HEART OF LOVE

From the Heart of the Universal Father — the Heart of God — flows an endless and abundant stream of unconditional, creative, life giving and loving energy, which has always and will always saturate the entire Master Universe and beyond into Infinity. What does this mean for every living and evolving creature? What does this mean for planets, Local Universes, galaxies and more, all encompassing the Micro and Macro realms of Creation?

There simply is nowhere in Creation where the Creator's influence is not present. All that exists teems and vibrates with creative activity, even the minutest sub-atomic particles. It is this everywhere creative Love energy that holds all of Creation together. It originates from the Heart of God as the beginning point from which it flows and to which it all returns after completing the journey through Creation. It is likewise for the mortals from the inhabited planets after completing the ages-long ascension journey from imperfection to perfection, the flow back to the First Source.

Think deeply about your own journey through life. You are all born on this planet with a divine plan. The Creator gave mortals a life-plan and free will with a mind capable of choosing what your individual journey shall be as it is up to each individual to accept their assignment. God does not play hide and seek with anyone. Except that the Creator gave one command and that is to become perfect like He is perfect.

Truth Beauty and Goodness are always pouring forth from the Heart of God and saturating all of Creation. Therefore each thinking mortal has the capability to Think Truth, Choose Beauty, and Do Good.

An indomitable Spirit resides in each of you — a perfect Partner to listen to, to consult with and follow its prompts. This Gift also proceeded from the Heart of God to indwell, companion and assist you during your ascension journey back to the Source.

THE PULSE OF THE MASTER UNIVERSE

The endless possibilities of the Unqualified Absolute are centered around the absolutum of the Isle of Paradise, whence emanate the unimaginable agitations of the otherwise static quiescence of the Unqualified. And the endless throbbing of the material Paradise heart of the infinite cosmos beats in harmony with the unfathomable pattern and the unsearchable plan of the Infinite Energizer, the First Source and Center. SPACE RESPIRATION - CONTRACTION PHASE - SPACE CLEANSING

There is a difference between the functionality of the Upper Unpervaded Space Reservoir and that of the Lower Reservoir. In addition to their storage capacity, both Reservoirs function as filters for cleansing the impurities that are accumulated in space while out in the various Master Universe Space Zones. When this *dirty* space is returned to its source during the CONTRACTION phase it is first made nonpervadable as it passes through the Transmuting Regulation Channels, then it enters the Lower Unpervaded Space Reservoir to be subjected to the first step of the space cleansing process which consists of breaking down, or dematerializing dense atomic matter. However not all space impurities are atomic. There are also non-atomic components that enter the Lower Reservoir which do not need to be broken down in this manner, but are instead allowed to flow through the Premolition Circuit (core) where they undergo a different cleansing process on their way to the Upper Reservoir. As can be understood from these simple explanations there is a great deal of transfer that occurs, in both directions, across the Upper and the Lower Reservoirs! And all of it is powered by the great Master Universe engine, the Heart of God located at the very core of the Central Isle of Paradise. There remains a great deal to be revealed about Space Respiration, yet there is sufficient information in these simple Master Universe diagrams to illustrate the basic concepts and purpose of Space Respiration. Source: Urantia Book 11:6.2

The left side of the diagram illustrates Space Respiration during CONTRACTION.

The right side of the diagram illustrates Space Respiration during EXPANSION.

DETAIL [A]

(not to scale)

The Premolition Circuit is NOT like a powerline running from pole-to-pole through your neighborhood. It is universally available to ALL willed-creatures who are appropriately encircuited. It lies beneath the surface of reality at the Pre-reality level. Pre-reality allows the I AM to maintain overcontrol of Reality. It pervades the entire Master Universe and can be accessed from anywhere. All willed-creatures have the latent and innate ability to encircuited into the Premolition Circuit through Perfected Will Attunement.

The Trinity Circuit runs directly up from the three Paradise Sources and Centers to the bottom of the Upper Unpervaded Space Reservoir where it conjoins Circuit 6.

Only the Premolition Circuit Core continues the climb up through Unpervaded Space to the Premolition Doorway where it conjoins Circuit 7 at the top of the MU Sphere. Refer to the MIND CIRCUITS OF THE MASTER UNIVERSE Diagram for more circuit details.

The Symphony of Creation envelops the Primary Premolition Core Circuit. As a three dimensional shape it resembles a double spiral, and delivers the building materials for all duplicate Macro Master Universes (possibly originating from the Unqualified Absolute), while the Primary Premolition Circuit, connected to the First Source and Center delivers life and communication to the same Macro Universes through the Premolition Doorway.

The Premolition Circuit Core of the I AM powers everything with the fragrance, colors and tones of Original LOVE, the original desire to DO GOOD. The Father's personality gravity circuit.

The spiritual gravity circuit of the Eternal Son.

The mind gravity circuit of the Infinite Spirit.

The First Source and Center exerts downward pressure on the Heart of God (blue arrows).

Ultimatum, which is alive, is shown in red. Ultimatum acts as an insulator to protect the Circle of Eternity from the immediate perfecting effect of Absolutum.

The Unqualified Absolute exerts upward pressure on the Heart of God (green arrows).

THE HEART OF GOD
The primal Premolition Core within the Pre-Thought sphere emanating the original desire to DO GOOD outward like a pulsating heart.

Directly underneath the location of the Trinity is the Zone of Infinity.

MIDSPACE

MIDSPACE

THE MIDSPACE ZONES

"The relatively motionless midspace zones impinging on Paradise and separating pervaded from unpervaded space are the transition zones from time to eternity, hence the necessity of Paradise pilgrims becoming unconscious during this transit when it is to culminate in Paradise citizenship. Time-conscious visitors can go to Paradise without thus sleeping, but they remain creatures of time." Source: Urantia Book 12:5.4

Dirty Pervaded Space flows back to Paradise

Clean Pervaded Space flows out from Paradise

UPPER AND LOWER SPACE RESERVOIR EQUALIZATION

So how does the Unpervaded Space from above Paradise find its way to the confluence just underneath nether Paradise?

During the EXPANSION phase of Space Respiration as the Lower Unpervaded Space Reservoir empties out through the Transmuting Regulation Channels, Unpervaded Space from the Upper Reservoir transfers through the Premolition Circuit (white inflowing arrows) at the core of the Trinity Circuit and down through Paradise center to empty out into the Lower Reservoir through the perforations in the lower part of the Premolition Circuit (white outflowing arrows), thereby maintaining an even volume and pressure in both reservoirs.

The original desire to DO GOOD (Premolition) is endemic in Unpervaded Space and then transfers into the experiential Circle of Eternity through the Transmuting Regulation Channels as nonpervadable space becomes pervadable space and then outflows during an expansion phase. Premolition permeates Pervaded Space even during a CONTRACTION phase when the process is reversed.

TRANSMUTING REGULATION CHANNELS

There is a confluence of pervaded and unpervaded space just underneath nether Paradise. Both types of space there flow through the transmuting regulation channels, where changes are wrought making pervadable space nonpervadable and vice versa in the contraction and expansion cycles of the cosmos.
