THE PRESENT MASTER UNIVERSE

Cross Section View (not to scale)

**NETHER MASTER UNIVERSE**  
 It is less dense than the top part. It contains less dense materials on the bottom than on the top. It is deeper in space supply than the space supply on the top. The underbelly of the Master Universe contains slivers of live space material known as Perpetua.

The following plots of the Master Universe are given in accordance with the best information available today. These facts and dimensions involved are from the direct correlation of materials supplied to me by Rayson, who spoke through the Scribe, Ronald Besser, to prepare drawings to show the newly revealed purposes and shapes and distances involved in the Grand Universe and the imposition of the Master Universe as shown in accordance with further guidance from the Ancients of Days, situated on Uversa, the Capital of Superuniverse Seven, named Orvonton, and by expressed permission of Paradise, to allow the drawings prepared by Xavier, to show actual dimensions in certain cases.

I, Xavier, do process these drawings in accordance with the standards available to me from software loaned to me by the Spirit of Truth and the Spirit of Thought, both which are located on Salvington, and are hereby rescinded to my use so long as I am not instructed to provide additional drawings for the Science Officer, Rayson, and Avonal Son situated on Urantia at the time of the indictment of these drawings for purposes of education and use in laboratories throughout the planet of Urantia for now and for all future time, as that may be defined today or later.

I am Rayson, and I incline these drawings to be a fair representation of the actual facts disclosed to me in order to bring these drawings before the public for educational and other purposes of demonstration. In these disclaimers above me, I mention the Scribe, Ronald Besser, who is also assigned to me to partake of the lessons on Ultimacy and of the Absolute, views of time and space, and commend him for bearing with us, Rayson and Xavier, to present these drawings to the Universal Father on this date as they are corrected and prepared for publication on Uversa and Urantia. These words were dictated and the drawings edited and prepared for publication today, September 15, 2014, and to which I affix my Seal of Approval. I am Rayson, Science Officer and Liaison Officer to the Magisterial Mission.

The Central Continuum is an imaginary line added to these drawings for clarity.

The space that rotates above the Central Continuum (except in OSZ 4), remains unmoved below the Central Continuum.

The Emergency Reserved Space Pockets (ERSP) hold huge amounts of ultimatons in reserve for just in case possibilities of spatial collapse as the transition from space to no space to absolute areas without space (OSZ 5) goes forward. The Ultimatons reserved there are for sub-particle building in space. The ERSP are full of thought as well. Thought exists as small packets or "bubbles" of granular activity made up of thought cells not resolved in time, but resolved in space, for future usages.

Little is known about the Rod of Absolutum, other than its existence. It will not be a part of the completed Master Universe, in the far distant future. Its width varies, and has a depth of about four light years, and extends without interruption. The rod is of two layers. The inner layer being absolutum, and the outer layer being ultimatum. This line is responsible for the ability of space to be folded and extruded into thinner plates than normal for unrevealed reasons. Space travel would be impossible for humans, and even though they do not know the reasons why they can do it, without this line as it allows superimposition of space lane accessibility to be added infinitely to each other and produces a result of speed in the upper space regions (above the Central Continuum) that is several times the speed of light alone.

The width of the Master Universe from the Isle of Paradise out to OSZ 5 is about 2.3 trillion light years.  
 From the Isle of Paradise to the beginning of OSZ 4 about 1.4 trillion light years.  
 OSZ 1 about 25.4 billion light years across.  
 SUZ about 250 million light years across.  
 ISLE OF PARADISE over 4 billion light years across.

THE COMPLETED MASTER UNIVERSE

Outer Space Zone 5, the dome of absolute definitions of experiential creation will not cover the Isle of Paradise. The gravity bodies from OSZ 4 will trace the elliptical shape of OSZ 5 as it wraps around the four outer space levels, the time universes, and comes to a point where the time universes currently touch peripheral Paradise.

The distance between the outer edges of the material Master Universe is about 5 trillion light years  
 The distance between the outer edges of the fifth outer space zone is about 9 trillion light years
